

ABSTRACT OF THE DISCLOSURE

5 A multi-layer structure for packaging formed by
at least an inner layer, an outer layer and an
intermediate layer, the intermediate layer having an
islands-in-a-sea structure comprising a resin A
constituting sea portions and a functional resin B
constituting island portions, the sea portions
occupying not more than 80% of the area of the
10 intermediate layer in cross section, and the inner
layer and the outer layer being resins having
adhesiveness to said resin A. The adhesion among the
layers is improved without providing any particular
adhesive layers among the intermediate layer having a
15 function such as gas barrier property and the inner
and outer layers, and, besides, transparency is
improved.
